MEMORANDUM

EXECUTIVE SUMMARY

TO: Jim Scholl, City Manager
E. David Fernandez, Asst. City Manager

FROM: Gary W. Bowman, General Services Director

DATE: September 16, 2009

SUBJECT: **Awarding the Bid of Wharton Smith, Inc. in the Amount of $3,982,000.00 for Construction of a Diffused Aeration System at the Richard A. Heyman Environmental Protection Facility**

ACTION STATEMENT:

This resolution will approve the low bid of $3,982,000.00 from Wharton Smith, Inc. to construct a diffused aeration system at the Richard A Heyman Environmental Protection Facility (Wastewater Treatment Plant)

The City will be reimbursed for 65% of this project from US Army Corps of Engineers funding that was expedited through stimulus legislation.

BACKGROUND:

The City currently has an activated sludge process that uses mechanical surface aerators to transfer oxygen into the biomass that removes pollutants from the wastewater received at the Wastewater Treatment Plant.

After completion of a major rehabilitation to the City's wastewater collection system, flow to the plant was reduced approximately 50% from an average of 8.2 mgd to the current 4.4 mgd. Data shows that while the flows remain significantly below the design values, the wastewater concentrations are higher than design values, a common trend as more efficient "low flow" devices are used and infiltration problems are eliminated.

The City Commission approved a task order from CDM, Inc. to design a new diffused aeration system for the Wastewater Treatment Plant in 2007.

(Resolution 07-378)

PURPOSE & JUSTIFICATION:

Upon research, it has been estimated that with higher organic wastewater loads arriving at the facility, a fine bubble diffused aeration system to meet the oxygen needs of the facility will provide a lower present worth cost (capital cost and operation and maintenance cost) compared to the option of retaining (replacement/rehabilitation) mechanical surface aerators to perform this function.

Thus it is recommended that the surface aerators be replaced with a new fine bubble diffuser system. This project will utilize the abandoned incinerator portion of the solids building for installation of the blower equipment.

The City must demonstrate we are committed to implement and construct this diffused aeration system in order to obtain the greatest amount of federal grant funds. Army Corps of Engineers stimulus funding will reimburse the City for 65% of the costs of this project. At a recent City Commission meeting, a resolution was approved that authorized the US Army Corps of Engineers to fund local wastewater projects, specifically this Diffused Aeration Project. (Resolution 09-228)

Bids for the project were opened on September 16, 2009. Wharton Smith, Inc. was the low bidder at $3,982,000.00

OPTIONS:

1. The City could elect to retain their existing surface aeration system. This option would require a capital outlay to ensure long term, safe and reliable operation of the aeration equipment. Deterioration of the aerator structural platforms and walkways need to be addressed for safety and for reliable operation of the surface aerators. This option will not address the current oxygen transfer needs unless the existing aerators are upsized and replaced.

   Failure to move forward on this project would eliminate the possibility of receiving 65% funding support from the US Army Corps of Engineers. Funds received for this project have deadlines associated with them, and delays could jeopardize these funds.

2. The City also looked into augmenting their existing surface aerators with the addition of fine bubble diffusers in the last sections of the aeration tank. Added diffusers would provide the needed oxygen transfer capability. This option would need to include rehabilitation costs for the structural platforms and walkways.

3. The City can convert the existing aeration tanks into a fine bubble diffused aeration system. This option eliminates the rehabilitation of the platforms and provides an aeration system that consumes less power and reduces operational costs. It provides the City with process blowers that are reliable and serviceable without the problems associated with maintenance of surface aerators. It will also allow us to have 65% of the project funded through ACOE federal stimulus funding.

FINANCIAL IMPACT:

The fees for this project will be funded through sewer budget line item 401-3503-535-65. The Diffused Aeration project is included in the FY 2010 sewer capital improvement plan (Project # SE0010).

The Army Corps of Engineers will reimburse the City for 65% of the cost of this project through federal funding that was expedited through the stimulus legislation. Additionally, the US Navy will contribute 23% of the City's share of the total project cost since the Wastewater Treatment Plant's costs are shared. The City will pay the remaining amount.

Funds for this project are budgeted as follows:

Navy Share	$ 320,551.00
ACOE Grant	$2,588,300.00
City Sewer Utility Funds (account # 401-3503-535-65)	$1,073,149.00
Total	$3,982,000.00

RECOMMENDATION:

The staff recommends option # 3, that the City awards the construction contract to the low bidder Wharton Smith, Inc. in the amount of $3,982,000 so that we may proceed with the Diffused Aeration project.

MANAGER hereinafter called OWNER and Wharton-Smith, Inc with legal address and principal place of business at 750 Monroe Road, Sanford, FL 32771 hereinafter called CONTRACTOR. OWNER and CONTRACTOR in consideration of the mutual covenants hereinafter set forth, agree as follows:

ARTICLE 1. WORK.

1.1 CONTRACTOR shall perform the Work as specified or indicated in the Contract Documents. The Summary of Work is as described in SECTION 01010.

ARTICLE 2. ENGINEER.

2.1 The Project has been designed by Camp Dresser & McKee, Inc. (CDM) who will act as ENGINEER in connection with completion of the Work in accordance with the Contract Documents.

ARTICLE 3. CONTRACT TIME.

3.1 The Work will be fully and final completed on or before August 15, 2010. This is the final completion date for this Work. Substantial completion, that enables the OWNER to continuously and successfully utilize the Work for the purposes of which it is intended, shall be reached by July 15, 2010. The prosecution of Work by the CONTRACTOR shall allow beneficial occupancy of a portion of work prior to substantial completion.

3.2 CONTRACTOR agrees that the Work shall be prosecuted regularly, diligently and uninterruptedly and at such rate of progress as will insure full completion thereof within the Contract Time stated above. It is expressly understood and agreed, by and between CONTRACTOR and OWNER that the Contract Time is reasonable for the completion of the Work, taking into consideration the average climatic range and usual industrial conditions prevailing in this locality.

ARTICLE 4. CONTRACT PRICE.

4.1 OWNER will pay CONTRACTOR for performance of the Work in accordance with the Contract Documents in current funds at the Corp. Address agreed upon in the CONTRACTOR's Bid Form attached to this Agreement. An OWNER's contingency allowance of $225,000.00 (two hundred and twenty-five thousand) is included in this amount for the sole use of the OWNER to cover unanticipated costs. Any amount remaining in the allowance at the completion of the work shall belong to the OWNER. The CONTRACTOR shall only be entitled to that amount of the contingency allowance that is formally allocated and assigned by the OWNER towards specific project activities or tasks performed by the CONTRACTOR.

All progress payments will be on the basis of the progress of the Work measured by the schedule of values provided for in Paragraph 14.01. of the General Conditions.

6.2 Prior to Substantial Completion, progress payments will be in an amount equal to ninety (90) percent of the value of the Work completed and ninety (90) percent of the value of materials and equipment not incorporated in the Work but delivered and suitably stored, less, in each case, the aggregate of payments previously made.

6.3 Upon Substantial Completion, OWNER will pay an amount sufficient to increase total payments to CONTRACTOR to ninety-five (95) percent of the Contract Price, less retainages as ENGINEER shall determine, in accordance with Paragraph 14.02. of the General Conditions.

They also recognize the delays, expense and difficulties involved in proving, in a legal or arbitration proceeding, the actual loss suffered by OWNER if the Work is not completed on time. Accordingly, instead of requiring any such proof OWNER and CONTRACTOR agree that as liquidated damages for delay (but not as a penalty) CONTRACTOR shall pay OWNER $3,000.00 per day for each calendar day of delay until the Work is complete.

7.2 Provided, that CONTRACTOR shall not be charged with liquidated damages or any excess cost when the delay in completion of the Work is for reasons included in Paragraph 12.03. of the General Conditions.

We have audited the accompanying consolidated balance sheets of Wharton-Smith, Inc. and Subsidiaries (the Company) as of March 31, 2009 and 2008, and the related consolidated statements of operations, changes in stockholders' equity, and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement.
