PROFESSIONAL ENGINEER CERTIFICATE

I hereby certify that I am a registered professional engineer in the State of Florida practicing with Calvin, Giordano & Associates, Inc., a corporation authorized to operate as an engineering business, EB 00006500, by the State of Florida Department of Professional Regulation, Board of Professional Engineers, and that I have prepared or approved the evaluation, findings, opinions, conclusions, or technical advice hereby for:

PROJECT: Key West Old Town Speed Study
LOCATION: Key West, FL.

I acknowledge that the procedures and references used to develop the opinion are standard to the professional practice of transportation engineering as applied through professional judgment and experience.

APPENDIX

EXECUTIVE SUMMARY

Calvin, Giordano & Associates, Inc. was retained by the City of Key West to prepare a traffic memorandum that summarizes the results of the Old Town Speed Study. The City requested CGA to collect traffic volume and speed data along select roadway corridors in the Old Town area of Key West. The traffic data collection was collected to identify the current 85th percentile speeds along the selected roadway corridors. The six corridors studied varied in the 85th percentile speeds based on the traffic data collection. The summary of the average 85th percentile speeds observed is as follows:

1. Tube Count Location #1 Eaton Street: 28 mph (EB) and 26 mph (WB)
2. Tube Count Location #2 Fleming Street: 26 mph (EB)
3. Tube Count Location #3 Whitehead Street: 23 mph (NB) and 21 mph (SB)
4. Tube Count Location #4 White Street: 29 mph (NB) and 29 mph (SB)
5. Tube Count Location #5 Catherine Street: 27 mph (EB) and 27 mph (WB)
6. Tube Count Location #6 South Street: 26 mph (EB) and 25 mph (WB)

According to Section 2B-13 of the MUTCD, "After an engineering study has been made in accordance with established traffic engineering practices, the Speed Limit (R2- 1) sign shall display the limit established by law, ordinance, regulation, or as adopted by the authorized agency. The speed limits shown shall be in multiples of 10 km/h or 5 mph."

Furthermore, per the Speed Zoning for Highways, Roads, and Streets in Florida effective March 2010; "A speed limit should not differ from the 85th percentile speed or upper limit of the 10-mph pace by more than 3 mph and it shall not be less than 8 mph. A speed limit of 4 to 8 mph less than the 85th percentile speed shall be supported by a supplemental investigation, which identifies the following:

- There are road or roadside features not readily obvious to the normally prudent driver, such as length of section, alignment, roadway width, surface condition, sight distance, traffic volume, crash experience, maximum comfortable speed in curves, side friction (roadside development), signal progression, etc., or;
- Other standard signs and markings have been tried but found ineffective

The average 85th percentile speeds observed all fall within 3 mph of a 25 mph speed limit for the road corridors except for the following roadway:

1. White Street northbound (+4 mph)

As mentioned in the context sensitive design section of this traffic study, the City of Key West streets should be considered Traditional Neighborhood Development (TND). The design principles of the FDOT Design Handbook provides emphasis on focusing on reducing speed to create safer and more comfortable environment for pedestrians and bicycles.

Therefore, it is recommended that a 25 mph speed limit be established for five of the six roadway corridors studied (all except Whitehead Street) based on the speed and volume data collected June 23rd through June 25th, 2017. Since the observed average 85th percentile speed on Whitehead Street between Eaton Street and Catherine Street was 23 mph (NB) and 21 mph (SB) respectively, the recommended speed limit for this facility is 20 mph based on the speed and volume data collected June 23rd through June 25th.

1.0 – INTRODUCTION:

Calvin, Giordano & Associates, Inc. was retained by the City of Key West to prepare a traffic memorandum that summarizes the results of the Old Town Speed Study. The City requested CGA to collect traffic volume and speed data along select roadway corridors in the Old Town area of Key West. The traffic data collection was collected to identify the current 85th percentile speeds along the selected roadway corridors. Figure 1

Figure 1: PROJECT LOCATION

shows the selected corridors that were studied.

2.0 –Traffic Data Collection

Bidirectional traffic speed and volume counts were collected at the following 6 corridors from Friday June 23rd through Sunday June 25th, 2017:

- Eaton Street between Whitehead Street and White Street
- Fleming Street between Whitehead Street and White Street
- Whitehead Street between Eaton Street and Catherine Street
- White Street between Eaton Street and Flagler Avenue
- Catherine Street between Simonton Street and White Street
- South Street between Simonton Street and White Street

The speed data collection produced 50th percentile and 85th percentile speed volumes for each of the study corridors. Standard traffic engineering principles call for the 85th percentile speed volume to be considered the free flow speed (FFS) for which the posted speed limit is set. Appendix A has the detailed results and summary of the traffic data collection for each corridor.

3.0 – EXISTING CONDITIONS

The first corridor is Eaton Street between Whitehead Street and White Street. After evaluation of the traffic control along this roadway corridor, CGA decided to place the pneumatic tube counters on Eaton Street between the William Street and Margaret Street intersections. Figure 2 shows the detailed traffic control along this road corridor. This location provides for the maximum distance of free flow speed in

Figure 2 Tube Count Location #1 Eaton Street (Between William Street & Margaret Street)

order to capture traffic operational characteristics. Tables 1, 2 and 3 provide the results of the traffic and volume data collection including the directional Average and 85th percentile speeds and the directional annual daily traffic volume.

Table 2 Tube Count Location #1 Eaton Street (June 23rd Results)

Street Name	Direction	Percentiles					
		15th	50th	Average	85th	95th	ADT
Eaton St	East Bound	17	22	22	28	30	4753
Eaton St	West Bound	17	22	21	26	29	6341

Table 3 Tube Count Location #1 Eaton Street (June 24th Results)

Street Name	Direction	Percentiles					
		15th	50th	Average	85th	95th	ADT
Eaton St	East Bound	18	23	23	28	32	4611
Eaton St	West Bound	16	21	21	26	29	5990

Table 4 Tube Count Location #1 Eaton Street (June 25th Results)

Street Name	Direction	Percentiles					
		15th	50th	Average	85th	95th	ADT
Eaton St	East Bound	18	23	23	29	32	4405
Eaton St	West Bound	16	22	21	27	29	5067

The average 85th percentile speed on Eaton Street for eastbound vehicles was 28 mph with an average ADT of 4,590 vehicles.

The average 85th percentile speed on Eaton Street for westbound vehicles was 26 mph with an average ADT of 5,799 vehicles.

Figure 3 Tube Count Location #2 Fleming Street (Between Elizabeth Street & William Street)

The second corridor is Fleming Street between Whitehead Street and White Street. After evaluation of the traffic control along this roadway corridor, CGA decided to place the pneumatic tube counters on Fleming Street between the Elizabeth Street and Williams Street intersections of this one-way facility. Figure 3 shows the detailed traffic control along this road corridor. This location provides for the maximum distance of free flow speed in order to capture traffic operational characteristics. Tables 4, 5 and 6 provide the results of the traffic and volume data collection including the directional Average and 85th percentile speeds and the directional annual daily traffic volume.

Table 5 Tube Count Location #3 Fleming Street (June 23rd Results)

Street Name	Direction	Percentiles					
		15th	50th	Average	85th	95th	ADT
Fleming St	East Bound	15	21	20	25	29	2555
Fleming St	West Bound						

Table 6 Tube Count Location #2 Fleming Street (June 24th Results)

Street Name	Direction	Percentiles					
		15th	50th	Average	85th	95th	ADT
Fleming St	East Bound	15	21	20	25	29	2121
Fleming St	West Bound						

Table 7 Tube Count Location #3 Fleming Street (June 25th Results)

Street Name	Direction	Percentiles					
		15th	50th	Average	85th	95th	ADT
Fleming St	East Bound	15	21	21	27	30	1849
Fleming St	West Bound						

The average 85th percentile speed on Fleming Street for westbound vehicles was 26 mph with an average ADT of 2,175 vehicles.

Figure 4 Tube Count Location #3 Whitehead Street (Between Virginia Street & Amelia Street)

The third corridor is Whitehead Street between Eaton Street and Catherine Street. After evaluation of the traffic control along this roadway corridor, CGA decided to place the pneumatic tube counters on Whitehead Street between the Virginia Street and Amelia Street intersections of this facility. Figure 4 shows the detailed traffic control along this road corridor. This location provides for the maximum distance of free flow speed in order to capture traffic operational characteristics. Tables 7, 8 and 9 provide the results of the traffic and volume data collection including the directional Average and 85th percentile speeds and the directional annual daily traffic volume.

Table 8 Tube Count Location #3 Whitehead Street (June 23rd Results)

Street Name	Direction	Percentiles					
		15th	50th	Average	85th	95th	ADT
Whitehead St	North Bound	11	18	18	23	27	1940
Whitehead St	South Bound	9	16	16	22	25	2334

Table 9 Tube Count Location #3 Whitehead Street (June 24th Results)

Street Name	Direction	Percentiles					
		15th	50th	Average	85th	95th	ADT
Whitehead St	North Bound	9	17	17	23	25	1900
Whitehead St	South Bound	8	14	14	20	24	2148

Table 10 Tube Count Location #3 Whitehead Street (June 25th Results)

Street Name	Direction	Percentiles					
		15th	50th	Average	85th	95th	ADT
Whitehead St	North Bound	10	18	17	23	27	1875
Whitehead St	South Bound	9	16	16	22	25	1926

The average 85th percentile speed on Whitehead Street for northbound vehicles was 23 mph with an average ADT of 1,905 vehicles.

The average 85th percentile speed on Whitehead Street for southbound vehicles was 21 mph with an average ADT of 2,136 vehicles.

Figure 5 Tube Count Location #4 White Street (Between Petronia Street & Olivia Avenue)

The fourth corridor is White Street between Eaton Street and Flagler Avenue. After evaluation of the traffic control along this roadway corridor, CGA decided to place the pneumatic tube counters on White Street between the Petronia Street and Olivia Avenue intersections of this facility. Figure 5 shows the detailed traffic control along this road corridor. This location provides for the maximum distance of free flow speed in order to capture traffic operational characteristics. Tables 10, 11 and 12 provide the results of the traffic and volume data collection including the directional Average and 85th percentile speeds and the directional annual daily traffic volume.

Table 11 Tube Count Location #4 White Street (June 23rd Results)

Street Name	Direction	Percentiles					
		15th	50th	Average	85th	95th	ADT
White St	North Bound	18	23	23	28	30	2907
White St	South Bound	17	23	22	28	31	2777

Table 12 Tube Count Location #4 White Street (June 24th Results)

Street Name	Direction	Percentiles					
		15th	50th	Average	85th	95th	ADT
White St	North Bound	18	23	23	29	31	2330
White St	South Bound	17	23	23	29	32	2219

Table 13 Tube Count Location #4 White Street (June 25th Results)

Street Name	Direction	Percentiles					
		15th	50th	Average	85th	95th	ADT
White St	North Bound	18	23	23	29	32	2064
White St	South Bound	17	23	23	29	32	1937

The average 85th percentile speed on White Street for northbound vehicles was 29 mph with an average ADT of 2,434 vehicles.

The average 85th percentile speed on White Street for southbound vehicles was 29 mph with an average ADT of 2,311 vehicles.

Figure 6 Tube Count Location #5 Catherine Street (Between Simonton Street & William Street)

The fifth corridor is Catherine Street between Simonton Street and White Street. After evaluation of the traffic control along this roadway corridor, CGA decided to place the pneumatic tube counters on Catherine Street between the Simonton Street and William Street intersections of this facility. Figure 6 shows the detailed traffic control along this road corridor. This location provides for the maximum distance of free flow speed in order to capture traffic operational characteristics. Tables 13, 14 and 15 provide the results of the traffic and volume data collection including the directional Average and 85th percentile speeds and the directional annual daily traffic volume.

Table 14 Tube Count Location #5 Catherine Street (June 23rd Results)

Street Name	Direction	Percentiles					
		15th	50th	Average	85th	95th	ADT
Catherine St	East Bound	16	22	21	27	30	450
Catherine St	West Bound	16	22	21	27	30	697

Table 15 Tube Count Location #5 Catherine Street (June 24th Results)

Street Name	Direction	Percentiles					
		15th	50th	Average	85th	95th	ADT
Catherine St	East Bound	15	21	21	27	29	334
Catherine St	West Bound	15	21	21	26	29	529

Table 16 Tube Count Location #5 Catherine Street (June 25th Results)

Street Name	Direction	Percentiles					
		15th	50th	Average	85th	95th	ADT
Catherine St	East Bound	16	22	21	28	30	278
Catherine St	West Bound	16	22	22	28	30	412

The average 85th percentile speed on Catherine Street for eastbound vehicles was 27 mph with an average ADT of 354 vehicles.

The average 85th percentile speed on Catherine Street for westbound vehicles was 27 mph with an average ADT of 546 vehicles.

Figure 7 Tube Count Location #6 South Street (Between Elizabeth Street & Alberta Street)

The sixth corridor is South Street between Simonton Street and White Street. After evaluation of the traffic control along this roadway corridor, CGA decided to place the pneumatic tube counters on South Street between the Elizabeth Street and Alberta Street intersections of this facility. Figure 7 shows the detailed traffic control along this road corridor. This location provides for the maximum distance of free flow speed in order to capture traffic operational characteristics. Tables 16, 17 and 18 provide the results

of the traffic and volume data collection including the directional Average and 85th percentile speeds and the directional annual daily traffic volume.

Table 17 Tube Count Location #6 South St. (June 23rd Results)

Street Name	Direction	Percentiles					
		15th	50th	Average	85th	95th	ADT
South St	East Bound	16	21	21	26	29	2668
South St	West Bound	16	21	21	26	29	2692

Table 19 Tube Count Location #6 South Street (June 24th Results)

Street Name	Direction	Percentiles					
		15th	50th	Average	85th	95th	ADT
South St	East Bound	15	20	20	25	29	2663
South St	West Bound	16	20	20	25	29	2412

Table 18 Tube Count Location #6 South Street (June 25th Results)

Street Name	Direction	Percentiles					
		15th	50th	Average	85th	95th	ADT
South St	East Bound	16	21	21	26	29	2501
South St	West Bound	16	20	20	25	29	2176

The average 85th percentile speed on South Street for eastbound vehicles was 26 mph with an average ADT of 2,611 vehicles.

The average 85th percentile speed on South Street for westbound vehicles was 25 mph with an average ADT of 2,427 vehicles.

4.0 – CONTEXT SENSITIVE DESIGN

CGA understands the City of Key West's unique characteristics of the City of Key West Street Network. This includes the use of the road right-of-way for various roadway/transportation elements that promotes the use of alternative modes of transportation such as pedestrian walkability, bicycle connectivity and transit facilities. The Florida Department of Transportation has issued the Traditional Neighborhood Development (TND) Handbook which is to be guided by the context of the built environment. TND communities rely on a stronger integration of land use and transportation than seen in Conventional Suburban Development (CSD) communities. In Conventional Suburban Developments, design speeds for thoroughfares outside subdivisions are rarely less than 35 mph and may be as high as 50 mph. TND in contrast, is very supportive of pedestrian, bicycle and transit modes. Land uses are mixed, with retail, office, civic buildings, and residential interwoven throughout the community, often located in the same buildings. Block sizes are a smaller scale to improve walkability and to create a fine network of streets that accommodate bicyclists and pedestrians, providing a variety of routes for all users. Within the TND context, the focus of the designer should be to ensure that speeds are managed for pedestrian comfort and safety rather than purely on the movement of motor vehicles.

CGA also understands that the City of Key West is currently in the process of completing a City-wide Bicycle and Pedestrian Master Plan which will address these various context sensitive design elements related to active transportation facilities including planning and design. TND street design principles have a different emphasis on design including the following:

- Focused on reducing speed to create a safer and more comfortable environment for pedestrians and bicyclists

This design approach is different due to the context sensitivity of the specific community.

4.0 – CONCLUSIONS AND RECOMMENDATIONS

Calvin, Giordano & Associates, Inc. was retained by the City of Key West to prepare a traffic memorandum that summarizes the results of the Old Town Speed Study. The City requested CGA to collect traffic volume and speed data along select roadway corridors in the Old Town area of Key West. The six corridors studied varied in the 85th percentile speeds based on the traffic data collection. The summary of the average 85th percentile speeds observed is as follows:

1. Tube Count Location #1 Eaton Street: 28 mph (EB) and 26 mph (WB)
2. Tube Count Location #2 Fleming Street: 26 mph (EB)
3. Tube Count Location #3 Whitehead Street: 23 mph (NB) and 21 mph (SB)
4. Tube Count Location #4 White Street: 29 mph (NB) and 29 mph (SB)
5. Tube Count Location #5 Catherine Street: 27 mph (EB) and 27 mph (WB)
6. Tube Count Location #6 South Street: 26 mph (EB) and 25 mph (WB)

According to Section 2B-13 of the MUTCD, "After an engineering study has been made in accordance with established traffic engineering practices, the Speed Limit (R2- 1) sign shall display the limit established by law, ordinance, regulation, or as adopted by the authorized agency. The speed limits shown shall be in multiples of 10 km/h or 5 mph."

Furthermore, per the Speed Zoning for Highways, Roads, and Streets in Florida effective March 2010; "A speed limit should not differ from the 85th percentile speed or upper limit of the 10-mph pace by more than 3 mph and it shall not be less than 8 mph. A speed limit of 4 to 8 mph less than the 85th percentile speed shall be supported by a supplemental investigation, which identifies the following:

- There are road or roadside features not readily obvious to the normally prudent driver, such as length of section, alignment, roadway width, surface condition, sight distance, traffic

volume, crash experience, maximum comfortable speed in curves, side friction (roadside development), signal progression, etc., or;

- Other standard signs and markings have been tried but found ineffective

The 85th percentile speeds observed all fall within 3 mph of a 25 mph speed limit for the road corridors except for the following roadway:

1. White Street northbound (+4 mph)

As mentioned in the context sensitive design section of this traffic study, the City of Key West streets should be considered Traditional Neighborhood Development (TND). The design principles of the FDOT Design Handbook provides emphasis on focusing on reducing speed to create safer and more comfortable environment for pedestrians and bicycles.

Therefore, it is recommended that a 25 mph speed limit be established for five of the six roadway corridors studied (all except Whitehead Street) based on the speed and volume data collected June 23rd through June 25th, 2017. Since the observed average 85th percentile speed on Whitehead Street between Eaton Street and Catherine Street was 23 mph (NB) and 21 mph (SB) respectively, the recommended speed limit for this facility is 20 mph based on the speed and volume data collected June 23rd through June 25th.
