

TRIMMED TREES = LESS DAMAGE after a **HURRICANE**

Keeping trees trimmed away from electrical lines helps Keys Energy Services (KEYS) provide reliable electricity before and after a storm.

Please make sure your trees' branches are at least 10 feet away from all electrical lines.

If tree limbs are intruding on electrical lines, do not attempt to trim them yourself. Instead, call KEYS so a trained tree trimmer can safely trim the limbs away from electrical lines. Call KEYS at (305) 295-1010 or visit KeysEnergy.com to request free tree trimming today!
