

Historic Architectural Review Commission

Agenda Packet

August 10, 2010 – 3:00 p.m.

City Commission Chamber

Old City Hall, 510 Greene Street

Item 5.b.5.

Request to remove two non historic additions and built a new two story addition- **#513 Truman Avenue Applicant: Dar Castillo Affiliated Design and Construction Management (H10-01-243)** Remove two non historic additions on rear and construct a two story rear addition.

5b-5- Request to remove two non historic additions and built a new two story addition - **#513 Truman Avenue - Applicant: Dar Castillo, Affiliated Design and Construction management (H10-01-243)**

Remove two non historic additions on rear and construct a two story rear addition

According to the Florida Master Site Files the building located on 513 Truman Avenue is listed as a contributing resource and was built in 1933. The contributing house is a one story frame vernacular structure with an addition attached on the back.

After a review of the Sanborn maps and doing a visual inspection of the house staff understand that this building has been altered through time. The 1948 and 1962 Sanborn maps reveal that the building has different footprints; the Sanborn Map of 1962 shows an elongated rectangular footprint with a back attached addition almost half of the width of the house. The proportion of the depth of the house footprint is almost twice the width of the front porch. The 1948 Sanborn map shows a less elongated footprint; the depth of the house is almost 2/3 of the width of the front porch. Also on this map the footprint of the building shows an attached addition on its east side. No accessory structures are shown in the historic maps. The Survey map provided shows the actual footprint of the house as rectangular in shape with two attached additions on its back. The depth of the house is one time and a quarter the width of the front porch. The building's main façade has stucco.

The proposed plans include the demolition of the two additions of the back of the house and the removal of three sheds. The plans also include the construction of a two story addition on the back of the building.

Because this application includes a proposed demolition a first reading should take place in order to consider this request. Staff understands that the Code of Ordinances as well as the Historic Architectural Guidelines should be reviewed for this application. The Code, under Sec. 102-218, establishes the criteria for demolitions to be used by the Historic Architectural Review Commission when reviewing a Certificate of Appropriateness. According to the Code Sec. 102-218 establishes the following;

- (a) The historic architectural review commission shall issue a certificate of appropriateness for an application for demolition:
 - (1) If the subject of the application is a contributing or historic building or structure, then it should not be demolished unless its condition is irrevocably compromised by extreme deterioration or it does not meet any of the criteria of section 102-125(1) through (9).**

(2) For a contributing historic or noncontributing building or structure, a complete construction plan for the site is approved by the historic architectural review commission.

(b) The historic architectural review commission shall not issue permits that would result in:

(1) Removing buildings or structures that are important in defining the overall historic character of a district or neighborhood so that the character is diminished;

(2) Removing historic buildings or structures and thus destroying the historic relationship between buildings or structures and open space; and

(3) Removing an historic building or structure in a complex; or removing a building facade; or removing a significant later addition that is important in defining the historic character of a site or the surrounding district or neighborhood.

(4) Removing buildings or structures that would otherwise qualify as contributing, as set forth in section 102-62(3).

(c) Nothing in this section is intended to alter the authority of the Building Official to condemn for demolition dangerous buildings, as provided in chapter 14 of the Code of Ordinances.

(Ord. No. 97-10, § 1(3-10.3(E)(2)(c)), 7-3-1997; Ord. No. 06-14, § 12, 8-1-2006)

The Code also establishes, under Sec. 102-1, Definitions, that a historic building or structure means;

any building or structure which, in whole or in any structural part, was built 50 or more years prior to the current date, and which is located in the historic zoning districts of the city or has been designated as a historic building and/or structure.

It is staff understanding that the actual additions attached to the back of the contributing building are non historic. The latest Sanborn map evidences different footprint configurations of the building when comparing it with the actual Survey. The existing sheds are also non historic structures.

Staff understands that the proposed demolition of the non historic structure can be considered pursuant the Code of Ordinance section 102-218- Demolitions in the historic district. The applicant has included on the submitted plans a design that includes a second story addition.

Staff recommends to this commission to **approve** the request of demolition, as represented in the plans. This project will require a second reading.
