Subject: Approve the Award of ITB#15-022 *Truman Waterfront Park Phase IA* construction to Charley Toppino & Sons, Inc. in the total amount of $17,453,752.67.

ACTION STATEMENT

This Resolution would approve a contract award of $17,453,752.67 to Charley Toppino & Sons, Inc., for construction of Phase IA of the Truman Waterfront Park Base Bid and Additive Alternates 1, 3 and 4, and authorize the City Manager to execute this agreement and any necessary budget transfers/amendments.

BACKGROUND

The City of Key West Naval Properties Local Redevelopment Authority (LRA) awarded RFQ No. 11-004 - Professional Landscape Architectural/ Engineering/Architectural/Land Surveyor Services for Truman Waterfront Upland Design and Construction Administration to Bermello Ajamil and Partners, Inc. (BA) in May 2011 (Resolution #11-261). BA's contract was approved in November 2011 (Resolution #11-327). The first step in the process was finalizing the Master Plan and approval of a Major Development Agreement as approved by Resolution #12-065. Resolution #14-095 authorized BA to design and prepare construction bid documents for construction of Phase I of the park. The amphitheater and Building 103 were not included in Phase I.

Following City review of the 50% construction documents, the associated cost estimate and available and projected funding, project sub-phases, designated Phase IA and 1B, were established. Phase IA focused on provided the City of

Key West with a recreational park, while Phase 1B included a Community Center, Horse Stables and parking. As shown in the attached figure, Phase IA was further sub-divided into three Notice to Proceeds (NTPs). Targeted for construction between Fiscal Year (FY) 2016 and 2018, Phase IA consists of infrastructure supporting the park (NTP 1), the Central Park Area (NTP 2) and the North Park Area (NTP 3).

100% construction documents for Phase IA were submitted by BA on August 20, 2015. The construction documents were assembled in City ITB#15-020 *Truman Waterfront Park Phase 1A* and bid during September 2015. Responsive bidders consisted of:

Charley Toppino & Sons, Inc. (Toppino)
D.N. Higgins, Inc.

Respective bid proposals and tabulation are attached.

As indicated in the bid tabulation, Toppino was the apparent low bidder with a lump sum base bid price (the sum of NTP 1, 2 and 3) of $16,894,991.17. Following review of the received bids against available and projected funding, staff has recommended acceptance of the following bid alternates:

#1. Saw cut East Quay concrete to maximize North Park (NTP 3) greenspace:	$170,811.50
#3. Construct Eaton Street Connector (NTP 3) as required by NAS Key West:	$367,950.00
#4. Increase Pollution Liability Insurance limits to $5,000,000 as recommended by the City Risk Manager:	$20,000.00

Acceptance of the three NTPs and the above Additive Alternates results in a total project cost of $17,453,752.67.

Acceptance of Deductive Alternate 1 to delete landscaping along roadway between NOAA and the entrance to Fort Zachary Taylor (-$27,675.00) and Additive Alternate 2 (+$219,960.00) to color the East Quay concrete are not recommended.

PURPOSE AND JUSTIFICATION

Development of the Truman Waterfront Property has been a priority of the City of Key West for over 15 years. City Commission Resolutions 12-129 and 12-285 accepted recommendations and a Master Plan for the Truman Waterfront Property process. Resolution #12-065 approved finalizing the Master Plan and a Major Development Agreement for the Truman Waterfront Park. Approval of the current resolution before the LRA will facilitate construction of a community park, including roadways, sidewalks, parking lots, utilities, interactive waterfeature, play area, landscaping, green space, the East Quay promenade and the McCoy Gardens. Completion of Phase 1A will support development of future park components as directed by City Commission.

This resolution supports Key West Strategic Plan Infrastructure Goal #3, *Parks and recreation areas are assessable to all residents and visitors,* Culture Goals #1, 2 and 3 and Infrastructure Goal #1, *A transportation system which is aesthetically attractive, functional, efficient, safe and environmentally sensitive.*

FINANCIAL

The lump sum cost of $17,453,752.67 is funded from budget account 101-4303-543-6300, Project # GR0703 (Truman Waterfront Development) and Project # TR0501 (Truman Waterfront Roadway). Associated sanitary sewer related construction will be funded from budget account 401-3503-535-6500, Project #SE1505. Full funding is currently available for commencing construction during Fiscal Year 2016.

RECOMMENDATION

Engineering Services staff recommends the LRA approve a contract award of $17,453,752.67 to Charley Toppino & Sons, Inc., for construction of Phase IA of the Truman Waterfront Park Base Bid and Additive Alternates 1, 3 and 4, and authorize the City Manager to execute this agreement and any necessary budget transfers/amendments.

ADDENDUM NO. 2
ITB No. 15-022
TRUMAN WATERFRONT PARK PHASE 1A

This addendum is issued as supplemental information to the bid package for clarification of certain matters of both a general and a technical nature. The referenced bid package is hereby amended in accordance with the following items:

1.0 CONTRACTOR QUESTIONS AND RESPONSES:

1.01 Please provide rim elevations and inverts for "storm-water Inlets" within NTP 2, as they are not included on the structure table.
RESPONSE: Inlet rim elevations have been added to CP-03. Revised drawing included in this addenda.

1.02 Will there need to be a 2FT clean soil cap across the entire project?
RESPONSE: Parcel E2 currently has two feet (2') of fill over the contaminated soil. The contractor is responsible for providing an Engineering Control as defined in the Soil and Groundwater Management Plan (SGMP). Two feet (2') clean soil cap or other acceptable Engineering Control is only required for Parcels E2 and E3.

1.03 In reference to contaminated parcels, can the contractor re-use excavated soils within the top 2FT under impervious surfaces? Such as under asphalt or concrete.
RESPONSE: Per the SGMP, yes they can.

1.04 Will the contractor be able to re-use crushed concrete and asphalt onsite?
RESPONSE: The contractor is permitted to re-use recycled/crushed concrete as long as it meets the requirements defined in the Technical Specifications. Re-use of asphalt is PROHIBITED.

1.05 Is it the responsibility of the contractor to properly dispose of any excess fill at the end of the project or will the City pay for disposal?
RESPONSE: Yes it is the contractor's responsibility to properly dispose of excess fill at the end of the project at no additional cost to the City.

1.06 The most feasible option would be that the City (to) provide a disposal contingency or pay for disposal directly, as the contractor is limited on his ability to calculate this quantity accurately. Since a portion of the excavated fill may test at acceptable local disposal levels and some may test at higher levels requiring disposal at a landfill.
RESPONSE: It is the contractor's responsibility to understand the proposed improvements including those involving excavation, cut and fill. The City will NOT provide a disposal contingency or pay for disposal directly.

1.07 Will contaminant testing of the excavated stockpiles also be the responsibility of the contractor?
RESPONSE: Yes. Contamination testing of the excavated soil within known contaminated parcels will likely be necessary for offsite disposal characterization. The contractor should confirm the analytical parameters with the disposal facility. Note that soil excavated from a contaminated site may only be re-used within that same parcel. No testing will be required to re-use the soil within its originating parcel as long as it is utilized in a manner consistent with the provision of the Soil and Groundwater Management Plan and the required Engineering Controls.

1.08 In reference to plan Page SM-00 (Parcels E1, E2, E3, K…), since the site has been separated into sections based on soil contaminants, is the contractor to create a bermed laydown area for each parcel, in order to not cross contaminate soils?
RESPONSE: It is the responsibility of the contractor to implement the necessary measures to manage the soil and prevent cross contamination across parcels. Stockpiles must be managed to separate clean soil from contaminated soil. Section 3.3 of the Soil and Groundwater Management Plan provides additional guidance regarding stockpile management. Additionally, dust and sediment control requirements are addressed in Section 3.2 of the Soil and Groundwater Management Plan.

1.09 In reference to NTP 3 (ADD ALT 1), it states to "Saw cut curvy edge along east side of Quay/pedestrian promenade (in NTP3; north to Building 103…)". This work extends into NTP 2, and there is no alternate provided for NTP 2 saw cutting. How should the contractor handle this?
RESPONSE: The saw cutting of the curved East Quay concrete edge Add Alternate is only part of NTP3. The curved saw cut edge in NTP2 is part of the base bid. The dividing line between what is in the NTP2 base bid and NTP3 Add Alternate is the NTP phase line shown and labeled on plan sheets and graphically depicted on PP-00. The language for this Alternate in the Proposal has be clarified. A revised version of Page 15 (Proposal page 5 of 9) is included in this Addendum.

1.10 In reference to NTP 3 (ADD ALT 2), it states "Provide materials, labor and equipment to apply stained concrete wavy pattern on walkways as shown on the Hardscape Paving and Finishes Plans and Details and technical specifications…" This work extends into NTP 2, and there is no alternate provided for NTP 2 concrete staining. How should the contractor handle this?
RESPONSE: The staining of the concrete, as shown on LF-02, LF-03 and LF-04, extends the length of NTP 2 and NTP3, along the East Quay from Admiral's Cut to the boat ramp. Staining will be completed in NTP3 should the City choose to accept this Alternate. The language for this Alternate in the Proposal has be clarified. A revised version of Page 15 (Proposal page 5 of 9) is included in this Addendum.

1.11 In reference to Site Demolition plan CS-01 & CS-02, the curvy cut concrete seawall cap or slab that is hatched is showing "existing concrete to be demolished". Is this work to be included in additive alternates or base bid for each NTP? As it is not specified on the demo plan but asked for in the bid docs as an alternate.
RESPONSE: The Demolition Plans are delineated with the NTP phase line. Therefore, concrete demolition in NTP 2 shall be completed when work on that area is completed. The same principals apply to NTP 3.

1.12 In reference to mooring bollard refurbishment, are we to refurbish all mooring bollards along the project within NTP 2/NTP 3?
RESPONSE: Contractor shall refurbish all mooring bollards and do so as part of NTP2.

1.13 Please provide a detail explain how the mooring bollards need to be refurbished.
RESPONSE: Per No. 16 on the Paving and Finishes Legend on LF-06, contractor shall "sand blast to raw metal, apply primer and 2 coats of paint".

1.14 In the GMP it states "If groundwater is extracted, it must be contained, characterized and treated (if required) prior to discharge to a permitted discharge point or disposed off-site…" Please define what areas will require extracted groundwater treatment. Would carbon filtration be an adequate treatment for extracted groundwater? (Encotech carbon filtration system).
RESPONSE: Petroleum groundwater impacts have been documented at Parcels E2 and E3. Therefore, we would anticipate that treatment of dewatering effluent would be required for dewatering on those parcels. Also note that dewatering activities conducted on adjacent parcels may affect the migration of contaminated groundwater on the affected parcels. It is incumbent upon the contractor to demonstrate that dewatering will not cause migration of contaminated groundwater and a dewatering plan must be submitted to FDEP. The dewatering plan should propose the treatment details for FDEP approval. FDEP will make the determination if the carbon filtration system that is proposed will be sufficient. Carbon filtration is a typical treatment for petroleum impacted groundwater; however additional treatment may be necessary if other constituents are detected in the groundwater.

1.15 The geometry sheets don't list any horizontal control points or coordinates for layout. The engineer needs to have the project tied to horizontal control points and provide coordinates for everything. This is a very detailed design and needs to be staked to plan, not just made up in the field. Please provide this information.
RESPONSE: Horizontal control will be provided to the successful bidder prior to construction.

2.0 CLARIFICATIONS:

2.01 Contaminated soil may be used within the respective parcel it is excavated from, shown on the SMP and GMP Reference Map. Soil excavated or exposed from below 2'-0" within Parcel E2 and below the concrete slab within Parcel E3 are required to be covered with an "Engineering Control" as defined in the SGMP.

2.02 Excavated soil cannot be relocated from one parcel to another parcel.

2.03 Clean soil mixed with contaminated soil shall be considered contaminated.

2.04 The 90% opinion of probable cost includes line items for implementing the SGMP.

2.05 Contaminated soil can be "processed", as defined in the SGMP, and used for various purposes, such as "bedding" for underground pipes and conduit, as long as engineering controls are provided in accordance with the SGMP.

2.06 CONTRACTOR logistics for placing the site in safe condition to accommodate City Events, such as the Boat Races, is the CONTRACTOR'S responsibility and is not justification for a change order or additional compensation.

2.07 Excavated contaminated soils may remain within the same parcel until they are re-used or disposed. However, contaminated soils must be secured in such a manner as to be protected from human access (e.g. fenced) and exposure to weather or humans (securely covered with an impermeable material). The materials used to secure the soils must be regularly maintained to ensure that they do not deteriorate or move such as that soils become exposed at any time.

2.08 Soils located within a contaminated parcel must be treated as such and are therefore subject to the requirements outlined in the Soil and Groundwater Management Plan. According to the approved Soil and Groundwater Management Plan, soils may remain and be re-used within the same contaminated parcels as long as the required Engineering Control measures applicable to that parcel are implemented.

2.09 Technical Specifications Section 329300-14, Paragraph 3.14 is amended at follows:

A. Contractor is responsible for maintenance of all landscape for one (1) year from the date of Final Acceptance of each respective NTP.

2.10 The CONTRACTOR has the flexibility to bury/consolidate contaminated soil encountered or excavated within a Parcel. That is to say, the CONTRACTOR is permitted to excavate/strip the Engineering Control (2'-0" of clean soil) in Parcel E2, stockpile that clean soil within E2, raise the grades in E2 with contaminated soil from elsewhere in the Parcel and then add 2'-0" of clean fill or other Engineering Control, including the stockpiled material, on top of the contaminated soil.

2.11 Technical Specifications Section 329300-7, Paragraph 2.3, is amended at follows:

A. Granite Mulch: Free from deleterious materials and suitable as top dressing of trees and shurbs and consisting of.

1. Type: Granite. Mulch containing Calcium Carbonate or Limestone is strictly prohibited.
2. Size Range: ½" diameter, Poorly Graded containing no fines or other material that might impeded the flow/exchange of oxygen or water necessary for vigorous plant growth and health.
3. Color: light brown to tan. Contractor to provide sample to Landscape Architect for approval.

2.12 Technical Specifications Section 329300-14, Paragraph 3.9, is amended at follows:

B. Mulch backfilled surfaces of planting areas and other areas indicated.

1. Trees in Turf Areas: Apply granite mulch ring of 2-inch depth, with 36-inch (900-mm) diameter ring around trunks or stems. Do not place mulch within 2 inches of trunks or stems.

2. Granite Mulch in Grass Planting Beds: Apply 2-inch depth mulch extending 12 inches (300 mm) beyond edge of individual planting pit or trench and over whole surface of planting area, and finish level with adjacent finish grades. Do not place mulch within 2 inches (50.8 mm) of trunks or stems.

3.0 CONTRACT DOCUMENT CHANGES:

3.01 In addition to providing vehicular and pedestrian access to adjacent uses, CONTRACTOR shall also provide the same level of access to the boat ramp and the USCGC Ingham Floating Museum.

3.02 Amend Technical Specification Section 12300-2, 3.1, A. 1. and PROPOSAL, Page 5 of 9, NTP3 BID ADD ALTERNATE No. 1. are amended to say "north of Building 103" instead of "north to Building 103".

3.03 Technical Specification Section 012300-2, Part 3, is amended to add:

E. Add Alternate No. 4: Additional Pollution Liability Insurance.

1. The cost for an additional $3,000,000 in Pollution Liability Insurance (above and beyond the minimum $2,000,000 already required).

3.04 PROPOSAL, Page 5 of 9, is amended to include ADD ALTERNATE No. 4 to include the following: Additional cost to provide $5,000,000 in Pollution Liability Insurance.

3.05 The following attachments are included in Addendum No. 2 and are considered incorporated and part of the Contract Documents and are the CONTRACTORs responsibility to recognize and follow:

a. Cone of Silence per Section 2-773 of the City of Key West Code of Ordinance
b. Unreasonable Excessive Noise per Section 26-192 of the City of Key West Code of Ordinance
c. Maintenance of Traffic
d. Demonstration of Remediation Completion and Proposal for Removal of Deed Letter and Exhibit
